

News from Japan

[GH] Good news from Dan McCrimmon :

News from Japan

I received an e-mail from Board of Governor Tomonori (Bill) Higashi. He is fine, his kids are fine, his wife is still trapped in downtown Tokyo. He has been in touch with her by phone. She is not injured.

I am trying to get in touch with our guys up North. Bad phones and limited e-mail. Bill is trying too.

If anything changes dramatically, I will get back in touch with the group.

Dan McCrimmon
Chair - International Committee

[GH] This morning, I opened this from Bill Higashi:

Hello Gordy,

I was out of power for 8 hours, and I found how I was addicted to Information, gas and electricity. The metropolitan Tokyo is almost back to normal, but up north, some of the cities were totaled, and we have the danger of nuke leaks. I hope it will controlled soon....

We are resilient to such natural disasters, but this one seems a heavy hit. We still don't know how much damage and how many lost their lives.

Your fellow countrymen are giving us timely relief from the vessels offshore. WE ALL APPRECIATE IT VERY MUCH!

More later,

Bill
